

The PaymentBanc way

Payment options are still the number one reason for pet owners to be dissatisfied with veterinary care.*

What are you doing about it?

PaymentBanc offers a revolutionary solution for veterinarians and clinics.

We help you assess the risk of each client. You offer payment plans on your terms.

PaymentBanc completely manages your payment plans for a small, per-account price. Don't give up a large percentage of your treatment fee to third party financing companies.

Don't be a late adopter of this easy way to satisfy pet owner's greatest concern.

Practices have already testified. . . . *"We have a client who received an 'A' rating – meaning she should have been able to pay for her pet's services in a variety of ways. She told us she scheduled her dog's TTA surgery with us because we offered a payment plan."* (Maureen Beucher, Animal Emergency & Treatment Center Chicago)
